Education

Faculdade de Informática e Administração Paulista (FIAP): Bachelor's degree in Software Engineering **Aug/23 - Jul/27**

Professional Experience

Nibo: *Front-end Analyst Jr. III - Remote* **Jun/26 – Present**

- Development and maintenance of systems in Angular 22 and legacy SaaS systems.
- Daily use of Claude Code, with development fully supported by AI and human validation in Pull Requests.
- Orchestration of AI agents using Maestri, applying prompt engineering.
- Exposure to Microsoft Azure and AI Foundry cloud services.
- Automation of day-to-day activities and processes.

Banco Safra: *Systems Analyst Jr. - Digital Channels* **Jun/25 – Apr/26**

- Development and maintenance of banking applications using C# (.NET) on the back end and Angular with TypeScript on the front end.
- Development of agents using Generative AI, working on prompt creation, knowledge base structuring and agent tools.
- Handling of relational (Oracle SQL) and non-relational (MongoDB) databases, plus Redis caching.
- Monitoring and observability of production systems using Dynatrace and Kibana.
- Code management and deployment through GitLab, GitCloud and OpenShift.
- Interface prototyping in Figma, ensuring the visual and functional fidelity of layouts together with the design team.

IT Intern – Digital Channels **Feb/24 – Jun/25**

- Development of screens with Angular, JavaScript and HTML, ensuring layout fidelity and responsiveness.
- Maintenance and development in C#.
- Querying Oracle databases according to system demands.

Projects

Ecoa Fono – Care Plus (FIAP Challenge NEXT 2026) – 1st place

- Care Plus app tab for patients to do the speech therapy exercises from their sessions at home.
- Voice guidance in Portuguese and camera use to check whether the patient performs the movement correctly.
- Three tracks with 5 exercises each (children, adults and seniors), with larger text and buttons.
- Progress tracking and administrator mode for personalization and patient follow-up.
- React Native, Expo and TypeScript, with a web version.
- Computer vision (AI) with MediaPipe Face Landmarker, running on the device itself.

Hackathon Nibo

- Development, with AI, of solutions to make clients' day-to-day work easier within the Nibo platform.

Hackathon Safra IA Week

- Direct involvement in developing a sales-focused AI agent, now used in production.
- Prompt engineering, tool integration and knowledge base structuring.
- Connection and integration of the AI agent with front-end and back-end applications.

Skills

Qualifications: Microsoft Office, HTML, CSS, JavaScript, TypeScript, Angular, React Native, Python, Java, SQL, C#, MongoDB, Redis.

Tools and Technologies: Generative AI (Prompt Engineering), Computer Vision (MediaPipe), Claude Code, AI Agent Orchestration (Maestri), Microsoft Azure, AI Foundry, Dynatrace, Kibana, OpenShift, GitLab.

Languages: English (pre-intermediate), Spanish (basic)
